THE MAKING OF SPECTACLE
LENSES
Is a science that requires years of instruction and experience. It cannot be learned in a day. I learned to make camera lenses, which is the most particular work in the optical trade. This is the reason that the lenses I make are of superior quality and finish. I can make in my laboratory any kind of a lens that can be worn by any person who wears spectacles. I have the only plant for the making of lenses in this city, and the most complete in the state of Texas.
